

**Security, Productivity** and **Effectiveness** are reasons why building managers choose Crown as their Package Intercept partner.

Package Intercept is a “turn key” operation where Crown assumes responsibility for all incoming and outgoing packages of a building, then implements a custom tailored “tenant friendly” system designed to deliver all shipments directly to the recipient, while enhancing the security the building

This results in a highly efficient, organized “Package Room” while freeing up valuable security and management time spent on managing foot messenger/courier traffic. Most importantly, however, your flow of messenger traffic throughout your building is drastically reduced!

Call us and we will...

**Secure your building today!**
